

Introduction

This is a supplemental User Guide intended to describe the following SMART features, which will replace Batch Management, Transaction Entry, and Batch Edit Report features within EFS:

Filing>Data Entry

Broker Landing page>File>Data Entry

This guide is a sub section of the SMART User Guide. You may contact our Tech Support team via [email](#) to obtain a complete version of the Smart User guide.

Note: Development of this application is in progress; this guide may be updated as new releases are in place.

Prerequisites

You must have an authorized account with active credentials to SLTX's Online Filing System or SMART application. SMART utilizes the user credentials from the existing Electronic Filing System (EFS); therefore, separate credentialing is not necessary. Prior to being granted access to the SMART application and/or utilizing the API, each user is required to accept the necessary licensing agreements from within SMART: Privacy Policy, Terms of Use, and SMART Connector and/or API User Licensing Agreement (when applicable).

Environments

The following URLs are used for SMART:

Test: <https://test.sltx.org/> **Production:** <https://smart.sltx.org/>

Site Navigation

To navigate back one or more pages, you may use your browser's back button, the clickable breadcrumbs at the top of each page, or the left navigation panel.

Supported Browsers

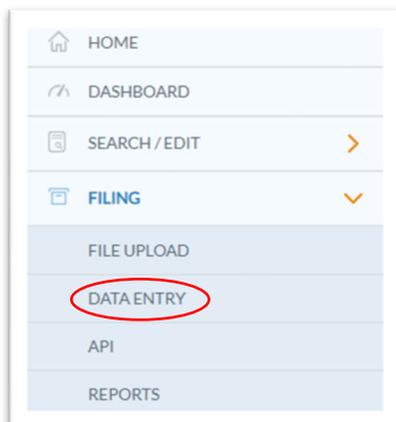

- Google Chrome
- Microsoft's Edge

NOTE: Internet Explorer (IE), regardless of the version, is not supported

Primary Navigation

Step 1: Select the Filing menu and click Data Entry.

*This will allow you to make Manual Web-Entry or Data Entry Filings, and includes the ability to Reverse, Update / Correct, or Delete previously filed transactions.

Data Entry landing page

Once you click Data Entry from the Filing menu, you will see the Data Entry landing page.

Features

[New Transaction](#) – allows user to navigate to the [Data Entry Transaction page](#) to make a filing with SLTX

[Recent filings](#) – allows user to see a summary of the last 20 transactions filed by your agency and includes transactions made by all filing methods (SLTX processed, SMART Data Entry, or SMART API). Click the Policy Number link to view details of the transaction.

[Save as PDF](#) – allows user to print a confirmation of the filing in a PDF format

[Go to Search / Edit](#) – allows user to navigate to the Policies Search/Edit page

[Notable changes between SMART Data Entry and EFS Filings](#) – based on feedback provided from external users during focus group sessions, several changes have been made to improve overall filing workflow

Data Entry (Manual Filing)

These steps may be used to create the following transactions: **Endorsement, Audit, Installment**

Step 1:

Click **New Transaction** from the Data Entry landing page to make a new filing with SLTX, such as a new or renewal policy / binder, audit, cancellation, premium endorsement, name change, etc.

<Future Release> You may also file a reversal, delete, or update (correct) an existing filing.

Step 2:

Select the type of transaction by clicking on the corresponding Transaction Type Tile, then click **NEXT**.

<Future Release> Cancellation, and Reinstatement.

The screenshot shows a web interface for selecting a transaction type. At the top, there is a breadcrumb trail: Home / Filing / Data Entry / Transaction Type. Below this is the heading "Data Entry" and a sub-heading "Select Transaction Type". In the top right corner, there is a navigation bar with buttons for "Filing", "Update/Corrections", "Reverse", and "Delete". The main content area contains a prompt: "Please select a transaction type to file." Below this prompt are seven transaction type tiles, each with a radio button and a description:

- New Policy**: Policy issued for the first time.
- Renewal**: Policy issued in subsequent policy terms (to extend an already existing policy).
- Audit**: An adjustment of the premium on a policy based on an audit. An audit must be for the entire time the coverage was in effect.
- Cancellation**: Policy is cancelled at the request of the company or the insured.
- Endorsement**: Change(s) to a policy. Used to add or delete coverage from a policy.
- Installment**: Used to let the insured pay out the premium. Usually setup in equal amounts. May be monthly, quarterly, semi-annually, annually, etc.
- Reinstatement**: If there was a Cancellation and premium was returned there would be additional premium for the reinstatement.

At the bottom right of the screen, there are "Cancel" and "Next" buttons.

Step 3:

Select the sub-type by clicking on the corresponding Sub-Type Tile.

<Future Release> All other non-premium endorsements shown below, and Audit Amendments.

Data Entry

Transaction Type: Endorsement | Report Date: 01/25/2022

Please select a transaction subtype:

- Premium Change**
Premium change endorsement or amendment to the Policy/Binder.
- Name Insured Change**
Non-premium endorsement changing the named insured of the Policy/Binder.
- Insurer / Company Change**
Non-premium endorsement changing the Insurer, Company, or Security that is insuring the risk on the Policy/Binder.
- Policy Number Change**
Non-premium endorsement changing the policy number of the Policy/Binder.
- Expiration Date Change**
Non-premium endorsement changing the Expiration Date of the Policy/Binder. Most often used to shorten the period. Date Extensions should be processed as a Renewal.
- Inception Date Change**
Non-premium endorsement changing the Inception/Effective Date of the Policy/Binder. May also be used to change both the Inception and Expiration Dates.
- Other Non-Premium Endorsement**
Other non-premium endorsement than those already listed.

Find a Policy
Input the policy number and effective date of the Endorsement and then click Search to locate the Policy / Binder.

Policy No. Effective Date

Features

“Find a Policy” allows SMART to identify the parent policy first (by inputting the policy number and effective date of the child transaction). This eliminates the need to search for and/or input the “parent policy ID” and allows the coverage code(s) to be automatically applied to your child transaction.

Step 4:

Input the policy number and effective date of your transaction (i.e., endorsement, audit, installment) and click SEARCH to locate the Policy/Binder transaction.

Find a Policy
Input the policy number and effective date of the Endorsement and then click Search to locate the Policy / Binder.

Features

You may click [VIEW](#) to see a listing of the policy/binder record displayed, along with any child (or non-policy) transactions already in the system. To view Errors, click [ERRORS](#) column.

Step 5:

Select appropriate policy / binder, then click NEXT.

Find a Policy

Input the policy number and effective date of the Endorsement and then click Search to locate the Policy / Binder.

Recent Filings

Step 1:

After completing STEP 1 from [Primary Navigation](#), you will find the Recent Filings section on the [Data Entry Landing page](#). This section allows users to see a summary of the last 20 transactions filed by your agency and will include transactions made by all filing methods (EFS manual or automated submissions, SLTX processed, SMART Data Entry, or SMART API).

To perform a more in-depth search or to locate a specific transaction, click "Go to Search / Edit".

The screenshot shows the 'Data Entry' section of a web application. At the top, there is a breadcrumb trail: 'Home / Filing / Data Entry'. Below this is the 'Data Entry' title and a 'Get Started' section with the question 'What would you like to do today?'. There are two main action cards: 'New Filing' (blue) and 'Search / Edit' (white). The 'New Filing' card describes creating a new filing with SLTX and includes a 'New Transaction' button. The 'Search / Edit' card describes searching for and reviewing transactions and includes a 'Go to Search / Edit' button. Below these cards is a 'Recent Filings - Last 20 filings' section, which is highlighted with a red box. This section contains a table with columns: BATCH, POLICY NO., REFERENCE, TYPE, EFFECTIVE DATE, USER ID, TOTAL GROSS, and SAVE AS. The table lists five transactions, each with a PDF icon in the 'SAVE AS' column. Red arrows point from the text above to the 'Go to Search / Edit' button, the 'POLICY NO.' link in the first row, and the PDF icon in the first row.

Click the Policy Number link to view details of that transaction.

You may print a confirmation of individual filings by clicking the PDF icon.

Save as PDF

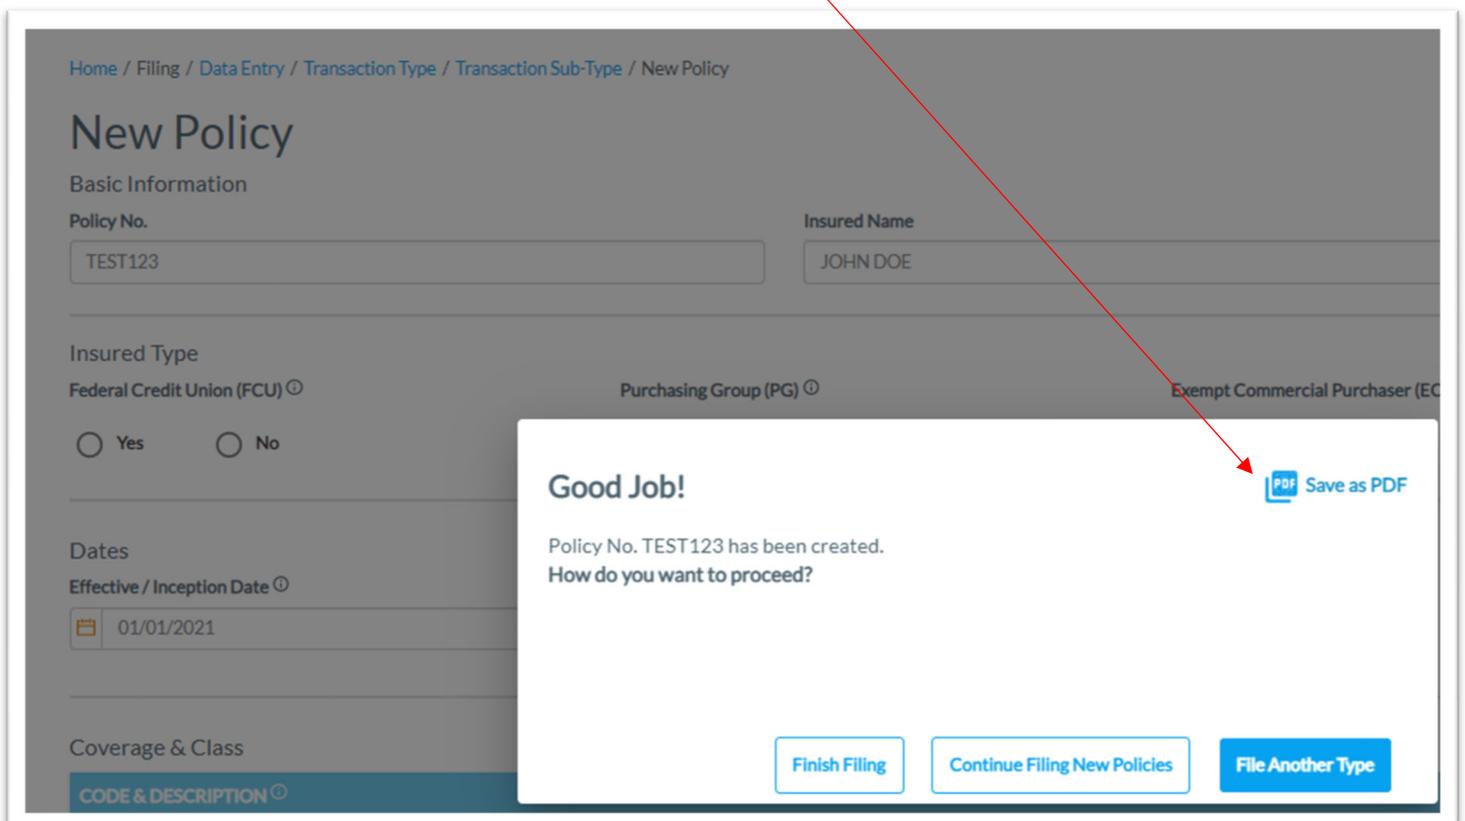

Step 1:

Click the PDF icon from Recent Filings section on the [Data Entry Landing page](#) to print a confirmation of the individual filing by clicking the PDF icon. This confirmation page will include all data elements input on the transaction, including Report Date, Batch Number, and SLTX ID (Policy ID) assigned by SLTX, and will serve as an affirmation of the filing and acceptance by SLTX.

Note: You may temporarily see another browser tab open and display the transaction's details. This is used to facilitate the print to PDF and will be closed once the PDF document is complete. The PDF file will be displayed at the bottom of your browser window. To open document, double click on the PDF file.

Alternately, the Save as PDF feature is also available immediately following the POST or submission of the filing from the "Good Job!" confirmation window.

Notable changes between SMART Data Entry and EFS Filings

1. It is no longer necessary to create a Batch. SMART will automatically add all transactions to your batch. SMART will create new batches as necessary to facilitate filing requirements; however, in almost all cases a single batch will be created for each day your agency reports filings and will contain all Data Entry filings made under your license (regardless of the user creating those filings).
2. It is no longer necessary to manually input (or type) the tax, stamping fee, and/or total gross amounts. SMART will automatically calculate these amounts based on the coverage premium(s) and policy fee that you enter and display the amounts on the entry screen. It is necessary that these amounts are shown on the insurance documentation (per [6 TIC 981.101\(c\)\(3\)](#) and [28 TAC 15.5\(a\)\(3\)](#)). You may use SMART's calculations to assist you in this confirmation.
3. Instead of a Batch Edit Report, users may [print a confirmation](#) of each filing at any time once the posting / filing is complete.
4. With non-Texas exposure, you are only required to enter individual state and corresponding premium. It is no longer necessary to separately enter Breakdown of States Summary premium.
5. For any non-policy or child transaction, you will be prompted to identify the parent policy first (by inputting the policy number and effective date of the child transaction). This eliminates the need to search for and/or input the "parent policy ID".
6. SMART will automatically display corresponding coverage codes (from the original policy filing) for any non-policy or child transactions. It will no longer be necessary to look-up that information prior to filing.
7. Pending transactions will no longer be created for Manual Data Entry transactions. Instead, users will be notified immediately on any errors, which will prevent the filing from being accepted. The user will be prompted to correct the errors to complete the transaction.
